

The TCPA should allow a consumer to file charges in Small Claims Court for the various violations including not providing the company's written telemarketing policy, not voluntarily providing the company's name and contact informatino, for calling a cell phone, etc. The TPCA should clearly state a consumer can collect \$500.00 for each of these violations even if it is the first time the telemarketer has called.

The TCPA should also be revised to make any telephone solicitations to home phones illegal. It is MY phone line. Telemarketers should not be allowed to call MY phone line unless they are going to pay for it.
